

What is AEA?

AEA or Arboriculture Education Associates is, in short, a unique organization offering a wide variety of professional training, and educational opportunities in the field of arboriculture.

Our staff of qualified educators can tailor specific programs to meet your needs. Whether it's presenting basic tree care, helping you to meet continuing education requirements, or developing comprehensive professional training and development programs, AEA can help.

AEA, in cooperation with the Rocky Mountain Chapter ISA, also offers a one of a kind certification program for those seeking the ISA Certified Arborist credential.

The ISA Certified Arborist credential is recognized worldwide as the benchmark for tree care professionals.

AEA Arborist Certification Training—Do you have what it takes?

The AEA Arborist Certification course is an exciting high-level training course for those seeking the International Society of Arboriculture Certified Arborist credential. This intensive educational program delivers a challenging environment, in which

Hands on training is emphasized.

students learn and master the knowledge and skills necessary to become an ISA Certified Arborist.

AEA Arborist Certification training courses offer a unique professional development opportunity you won't find elsewhere. A team of dedicated professionals will help you gain insight into how you can become one of the best of the best in arboriculture. You will have the opportunity to learn from and network with certified arborists, and urban forestry professionals from across the Rocky Mountain region. AEA Arborist Certification training is an investment in your professional future.

Who Should Attend?

Past AEA Arborist Certification classes have included individuals from a broad range of backgrounds, including:

- Tree Care Companies
- Nurseries
- Landscape Contractors
- Municipalities and Utility Providers
- Horticultural/Extension Advisors
- Private Citizens

Our Success

The International Society of Arboriculture Arborist Certification was developed to identify those individuals who have demonstrated a thorough knowledge of tree care practices, both through meeting extensive work experience requirements, as well as passing a stringent exam process. The success of the AEA Arborist Certification training program can be measured by the success of our students. Since 1999 **one hundred percent** of students completing the certification program have gone on to successfully pass the ISA Arborist Certification exam.

Students learn every aspect of professional tree care.

What Past Participants Have Said About AEA Training.

"I came into class with a small amount of knowledge and high expectations of what this course had to offer. Through the expertise and excellent teaching techniques of the instructors, my expectations were surpassed. Their patience, positive attitude, guidance, and personal knowledge of the field of arboriculture made the class informative, educational, and enjoyable. My personal knowledge and confidence increased a thousand fold thanks to AEA." -Nancy Pollock

"It was impossible not to learn from these classes. The AEA instructors definitely take you out of your comfort zone, but in a good way. Everyone participates, and I mean everyone. I've been to too many classes where students were allowed to just coast through. This was definitely not the case with AEA. This was the first training course I've ever been through that I really felt like I got my moneys worth." -Mike Dawson

"Thanks to this training, I'm now a certified arborist." -Curtis Griffith
